

Geology and Nonfuel Mineral Deposits of Greenland, Europe, Russia, and Northern Central Asia: Usgs Open-File Report 2005-1294-D (Paperback)

By Warren J Nokleberg

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. This report summarizes the geology and nonfuel mineral resources of Greenland, Europe, Russia, and Northern Central Asia and is a preliminary part of a major U.S. Geological Survey study called the Global Mineral Resource Assessment Project. This report is one of a series of regional reports covering the world and provides basic data on the identified resources and geologic setting, together with a brief appraisal of the potential for undiscovered mineral resources. The data in the regional report are derived from published information. An important source of data on production statistics, economic factors that affect the mineral industries, and historical information, is available in U.S. Geological Survey (USGS) publications Minerals Yearbook and the annual Mineral Commodity Summaries (available at //minerals.usgs.gov/minerals). In terms of production of metallic commodities and industrial minerals in recent years (U.S. Geological Survey, 2003, 2004, 2005), Greenland, the countries comprising Europe and Northern Central Asia, and Russia were major or moderate producers of aluminum, antimony, arsenic, asbestos, barite, bentonite boron, chromium, cobalt, copper, diamond, diatomite, feldspar, fluorspar, gemstones, gold, graphite, gypsum indium, iron ore, iron.

Reviews

Extensive guide for ebook lovers. It generally does not cost excessive. Your way of life span will likely be convert the instant you complete looking at this ebook.
