AN ILLUSTRATED AND DESCRIPTIVE CATALOGUE OF SURVEYING, PHILOSOPHICAL, MATHEMATICAL, OPTICAL, PHOTOGRAPHIC, AND STANDARD METEOROLOGICAL INSTRUMENTS (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from An Illustrated and Descriptive Catalogue of Surveying, Philosophical, Mathematical, Optical, Photographic, and Standard Meteorological Instruments The previous editions of this General Catalogue having been out of print for some time, I have now great pleasure in presenting this new and extended impression. Had my object been the mere enumeration of the names and prices of instruments, etc., the present edition would have been completed long since; but my desire was to unite with these a brief description of many of them, including not only those of recent design, but also of others for which explanations are often required. Amongst the new arrangements, I may mention the Deep Sea Thermometer, with which the real temperature of the sea at any depth has at length been determined; the Pocket Standard Barometer, by means of which the highest mountains or deepest shafts can be measured accurately; the extremely portable Traveller s Transit Theodolite, Pocket Altazimuth, Pocket Spirometer, and various important arrangements of Solar Radiation Apparatus, Anemometers, etc. To self-registering instruments much of my attention is constantly given, and several of them are now described for which I was honoured with the only Prize Medal awarded to this class of instruments at the Great Exhibition of 1862, as well as the much extended patronage of the leading Governments and Observatories of the world, as shown on the title page. For clinical, general medical and physical investigations of temperature, my arrangement of Self-registering Thermometers is now used exclusively, and many instruments of my design for these purposes are now also regarded as indispensable.
